

Windows Virtual Desktop

Migrate your Windows Server remote desktops and apps to Azure

Migrate your Remote Desktop Services (RDS) environment with simplified management and deployment experience on Azure.

Remote Desktop challenges

Scalable Remote Desktop deployment requires deep knowledge of what works and what doesn't

Meeting diverse user needs requires complex image management

Significant investment and effort required to manage infrastructure
Optimal deployment requires instrumentation, monitoring and ongoing fine-tuning

Upgrading RDS to newer server releases is challenging

DIY RDS migration to cloud is achievable but difficult

Need to keep using Windows Server 2008 & 2008 R2

Windows Virtual Desktop

Simplified management and deployment experience

- Leverage your existing partners, like Citrix or VMWare, for a unified hybrid solution
- Easy setup and deployment via Azure portal
- Best practices and patterns implemented by the Windows Virtual Desktop service
- Straightforward migration of existing RDS deployments to the cloud

Reduced management costs

- Unified management experience for Windows Server, Windows 10, and Windows 7 desktops/apps
- Infrastructure roles managed as a service by Microsoft
- Ongoing monitoring and fine-tuning by the service

Strong app compatibility

- Simplifies upgrade process to a new server release
- App compatibility for Windows Server with existing images used on-prem
- Free Extended Security Updates for Windows Server 2008 R2 desktops and apps

Windows Virtual Desktop simplifies RDS management and deployment

A fully hosted Remote Desktop Services session that offers both remote apps and desktop sessions

Benefit from deployment best practices and patterns

Infrastructure roles managed as a service by Microsoft

Free Extended Security Updates for Windows Server 2008 R2 desktops and apps
